

Station-free bike rental now available in UCD

Travelling around UCD has just got a whole lot easier as station-free bike rental is here. These GPS enabled bikes are located on bike ranks throughout the campus and are available for use in seconds, right from your phone. All you have to do to get in on the action, is download the BleeperBike App, register and find the nearest BleeperBike to you, scan the QR code on the bike to unlock and off you go. BleeperBike - a new safe, affordable and reliable way to travel around.

Search for "bleeperbike" in the Apple App Store or Google Play, the app is free to download.

How much does it cost to ride a bike?

Pay as you go options	Membership options
€5 top-up gets 5 rides	€10 for 1 month membership
€25 top-up gets 27 rides	€20 for 3 months membership
€50 top-up gets 55 rides	€75 for 12 months
1. A ride is 60 minutes of continuous usage	
2. Members get 4 free rides per day	

Where can I park when I finished my journey?

1 Find a designated parking rack

Our in-app map highlights all public bike racks nearest to you with an orange bike parking symbol.

2 Loop, Lock and Bleep!

Loop the red cable around the bike rack and put the black hoop into the RHS of the smart lock, then close the lever on the LHS of the smart lock and you will hear a bleep sound.

3 Press end journey

After hearing the bleep the final step is to press end journey in the app. Your BleeperBike has now been correctly parked.

Parking issues;

The majority of people park their BleeperBike correctly. Those who do not park correctly invariably make 1 of the following "big 2" parking mistakes;
1. Not parking at a designated parking rack. Cause = not taking time to open the app and clarify if the rack you are at has a designated parking symbol.
2. Forgetting to slide down the lever on the smart lock. Cause = The customer thinks that pressing end journey in the app is sufficient to complete their ride. The smart lock must be physically closed and the "end journey" pressed as the last step.
